SUMMARY

MSc in Statistics with a strong mathematical foundation and a deep interest in data analysis and statistical modeling. Experienced instructor and effective communicator, with proficiency in several programming languages.

EDUCATION

Master in Statistics *2023-2025*
Aarhus University

Bachelor in Mathematics (Statistics) *2020-2023*
Aarhus University

WORK EXPERIENCE

Student Data Scientist, BioXpedia *2024-2025*

- Implementing new and improving existing scripts in R and Bash to streamline our pipeline.
- Consulting on the design of experiments and analysis.

Mentor, MentorDanmark *2023-2024*

- Teaching math for high school students.

Teaching Assistant, Aarhus University *2022-2023*

- Introductory statistics and data analysis with R (Spring 22 and Spring 23).
- Introductory statistics and data analysis with MATLAB (Fall 22).

PROJECTS

Master's thesis: Particle Markov Chain Monte Carlo *2025*

- Made an R package bayesSSM implementing tools for performing Bayesian inference in State Space-Models.
- Applied Particle Markov Chain Monte Carlo to stochastic disease spread modeling.

Bachelor thesis: Asymptotic Normality for Tessellation-based Betti Numbers *2023*

- Formulated and proved two central limit theorems for persistent Betti numbers.
- Simulated data, formulated and tested relevant hypotheses.

ACTIVITIES

Chairman and Vice chairman, Kalkulerbar *2021-2023*

- Responsible for the overall operation of the Friday bar and the administrative side of running a Friday bar.

Tutor, Aarhus University *2021-2023*

- Guided new students through their transition to university.

PROGRAMMING LANGUAGES

- Bash, Julia, Python, R, SAS, Stan, SQL.
